

S&T International Cooperation Network for Eastern European and Central Asian Countries

Deliverable Title	5.7. - First annual monitoring report on EECA participation in FP7
Deliverable Lead:	Archimedes, HSE
Related Work package:	WP5 - Analyses, Monitoring and Review
Author(s):	Mrs. Ulle Must, Dr. Anna Pikalova
Dissemination level:	Internal
Due submission date:	31/12/2008
Actual submission:	09/02/2008
Project Number	212226
Instrument:	Coordination and Support Action (CSA)
Start date of Project:	01/01/2008
Duration:	48 months

Abstract	<p>The report was prepared within the FP7 Action “Science and Technology International Cooperation Network for Eastern European and Central Asian Countries - INCONET EECA”. This report was prepared as one of the outcomes of the INCONET EECA Task 5.3. “Analysis and review of S&T cooperation patterns”. An objective of the task 5.7. was the annual monitoring of the EU-EECA cooperation in FP7.</p> <p>The basis of current report is the E-CORDA online reporting facility, which enabled access on the outcome of concluded FP7 calls for proposals, including participation and performance statistics.</p>
-----------------	---

Project funded by the European Commission under the International cooperation activity of the Capacities Programme of the 7th European Framework Programme for RTD.

EXECUTIVE SUMMARY

The report was prepared within the FP7 Action “Science and Technology International Cooperation Network for Eastern European and Central Asian Countries - IncoNet EECA”. This report was prepared as one of the outcomes of the IncoNet EECA Work Package 5 “Analyses, Monitoring and Review”. In the line of the main objective of the WP5 “To address key factors influencing the scientific cooperation between the EU and the EECA countries, in order to identify needs, to propose solutions and to feed the policy dialogue at the level of the Platforms” one of the objectives of the task 5.3. “Analysis and review of S&T cooperation patterns” was specified as following “Annual Monitoring of the EU-EECA cooperation in FP7”.

1 INTRODUCTION

The 7th Framework Programme, with a total budget of over € 50 billion (Euratom FP7 € 2.7 billion for 5 years), constitutes a key tool to respond to Europe's needs in terms of jobs, competitiveness, sustainable development, to meet the research needs of other Community policies, and to maintain leadership in the global knowledge economy.

2007 was the first year of the implementation of FP7. More than 23,000 proposals were received in response to 54 calls, with a high number of participants (110,101). After the selection procedure, 2,854 of them were retained for funding (involving some 19,541 participants).

The ten Themes identified in the **Cooperation** programme reflect the key fields of knowledge and technology in which research excellence is particularly important to improve Europe's ability to address the social, economic, public health, environmental and industrial challenges for the future. In total, 8,030 proposals have been submitted in 2007 and more than 1,000 retained for funding.

In the **Ideas** programme, the first year of the ERC formal operation was characterised by the creation of management and organisational structures as well as the organisation of the first call of proposals, the "Starting Grants", designed to support researchers in the early stage of their careers. For this first call 9,167 proposals were submitted, showing the big interest to this new initiative. Almost 300 of them were retained for funding.

The **People** programme supports a range of actions to foster the training and networking of researchers, career development, life-long learning and industry-academia partnership. In 2007, 4,195 proposals were submitted and more than 1,000 retained.

The **Capacities** programme aims at developing the best possible resources and conditions for Europe's research community. In total, 1,753 proposals were submitted for the different activities of the programme, and approximately 300 were retained.

Regarding the **Euratom** FP7, 57 proposals were submitted on nuclear fission and radiation protection and 15 of them were retained for funding. 1

The launch of the 7th EU RTD Framework Programme (FP7), 2007-2013, places new emphasis on international research cooperation which is increasingly seen as being at the centre of Community policies.

Science and technological development has always been an international endeavour, but increasing global challenges such as intensified economic globalisation, the rise of new global players and the provision of global public goods, reinforce the case for a new approach to international cooperation in science and technology from a European perspective. The new approach to international cooperation in FP7 aims to rise to these challenges by way of innovative mechanisms for promoting international research collaboration. It aims to address three interdependent objectives:

1 Report from the Commission. Annual Report on research and technological development activities of the European Union in 2007. SEC(2008) 2380. COM(2008) 519 final.

- supporting European scientific and economic development through strategic partnerships with third countries in selected fields of science and by engaging the best third country scientists to work in and with Europe;
- facilitating contacts with partners in third countries with the aim of providing better access to research carried out elsewhere in the World;
- addressing specific problems that third countries face or that have a global character (e.g. by contributing towards Millennium Development Goals, addressing global climate change, combating biodiversity loss, water and energy scarcity).

2 ABBREVIATIONS AND DEFINITIONS

FP7	EU Seventh RTD Framework Programme, is implemented during the period of 2007 - 2013
EECA	Eastern Europe and Central Asia. The EECA region includes countries of Armenia, Azerbaijan, Belarus, Georgia, Kazakhstan, Kyrgyzstan, Moldova, Russia, Tajikistan, Turkmenistan, Ukraine, Uzbekistan
Health	Cooperation programme Thematic Priority “Health”
FAB	Cooperation programme Thematic Priority “Food, agriculture and biotechnology,,
ICT	Cooperation programme Thematic Priority “Information and communication technologies”
NMP	Cooperation programme Thematic Priority “Nanosciences, nanotechnologies, materials and new production technologies”
Energy	Cooperation programme Thematic Priority “Energy”
Environment	Cooperation programme Thematic Priority “Environment (including climate change)”
Transport	Cooperation programme Thematic Priority “Transport (including aeronautics)”
SSH	Cooperation programme Thematic Priority “Socio-economic sciences and the humanities”
Space	Cooperation programme Thematic Priority “Space”
Security	Cooperation programme Thematic Priority “Security”
Ideas	Ideas programme European Research Council grants
MCA	People programme Marie Curie Actions
ResInfra	Capacities programme area “ Research infrastructures “
SME	Capacities programme area “Research for the benefit of SMEs”
Regions of Knowledge	Capacities programme area “Regions of knowledge”
Research Potential	Capacities programme area “Research potential of Convergence Regions”
SiS	Capacities programme area “Science in society”
INCO	Capacities programme area “International cooperation”
Fusion Energy	European Atomic Energy Community (Euratom) field “Fusion

	Energy”
Fission	European Atomic Energy Community (Euratom) field “Nuclear fission and radiation protection”
AM	Armenia
AZ	Azerbaijan
BY	Belarus
GE	Georgia
KZ	Kazakhstan
KG	Kyrgyzstan
MD	Moldova
RU	Russia
TJ	Tajikistan
TM	Turkmenistan
UA	Ukraine
UZ	Uzbekistan
Associated	Associated Countries: Switzerland, Israel, Iceland, Liechtenstein, Montenegro, Norway
Candidate	Candidate Countries: Croatia, Former Yugoslav Republic of Macedonia, Turkey
EU-27	EU Member States: Austria, Belgium, Bulgaria, Cyprus, Czech Republic, Germany, Denmark, Estonia, Greece, Spain, Finland, France, Hungary, Ireland, Italy, Lithuania, Luxembourg, Latvia, Malta, Netherlands, Poland, Portugal, Romania, Sweden, Slovenia, Slovakia, United Kingdom
CSA	Funding scheme: coordination and support action
CSA-CA	Funding scheme: coordination and support action, coordination action
CSA-SA	Funding scheme: coordination and support action, support action
CP	Funding scheme: Collaborative project
SICA	Funding scheme: Specific international cooperation actions
BSG	Funding scheme: research for the benefit of specific groups
CP-CSA	Funding Scheme: combination of CP & CSA
NOE	Funding Scheme: network of excellence
MC	Funding scheme: support for training and career development of researchers (MARIE CURIE)
MC-ITN	Funding scheme: Initial Training Networks
MC-IAPP	Funding scheme: Industry-academia pathways and partnerships
MC-IOF	Funding scheme: International Outgoing Fellowships for Career Development
MC-IIF	Funding scheme: International Incoming Fellowships

3 METHODOLOGY OF THE ANALYSIS

The basis of current report is the E-CORDA online reporting facility, which enabled access on the outcome of concluded FP7 calls for proposals, including participation and performance statistics. At present, there are 8 reporting functions, yielding results at different levels of aggregation.

Current release of the FP7 consolidated proposals and participants database contains information and data on 132,869 applicants involved in 18,155 eligible proposals that were submitted in response to 90 FP7 calls for proposals for which validated evaluation and selection data is available centrally (as of 1st of October 2008).

3.1 Performance statistics: EECA countries in FP7 (as 10 October 2008)

4 CONCLUSION

The first round of calls for proposals has been launched in 2006/2007, the selection procedures have followed therefore allowing a first analysis of the results to identify some general trend.

Mid-June 2008, a total of 97.282 applicants participated in submitted proposals throughout the overall Capacities programme. 5.631 of them were third countries research entities among which 1.253 are from the EECA countries. The most active countries of this region are Russia with 633 submitted proposals, Ukraine – 273, and Belarus – 63.

Level of the successful projects with selected for the financial support in comparison with the EU MS, AC, and e.g. USA is not very high specifically for Russia – 16,79%, Ukraine – 14,83%, and Belarus – 12,7%, the most successful among the analysed countries is Georgia with the success rate = 17,94 %.

Figure 2 - Success Rate by Country in %

The analysis of participation of the EECA countries in the thematic priorities of the “Cooperation” programme through the first three years of FP7 implementation, show that the

most effective is ICT – 21 success projects, Transport – 20 and the third place is shared between Health and FAB – 19 projects by each.

The “People” programme comes the first in the EECA countries successful participation in the whole FP7 - 28 grants, then INCO – 23.

The successful projects with participation of the EECA most often are coordinated by the organisations from Germany, United Kingdom and Italy.
