

## S&T International Cooperation Network for Eastern European and Central Asian Countries

<b>Deliverable Title</b>	<b>5.7. - Second annual monitoring report on EECA participation in FP7</b>
Deliverable Lead:	Archimedes, HSE
Related Work package:	WP5 - Analyses, Monitoring and Review
Author(s):	Mrs. Ulle Must, Dr. Anna Pikalova
Dissemination level:	Internal
Due submission date:	31/12/2009
Actual submission:	02/01/2009
Project Number	212226
Instrument:	Coordination and Support Action (CSA)
Start date of Project:	01/01/2008
Duration:	48 months

<b>Abstract</b>	<p>The report was prepared within the FP7 Action “Science and Technology International Cooperation Network for Eastern European and Central Asian Countries - INCONET EECA”. This report was prepared as one of the outcomes of the INCONET EECA Task 5.3. “Analysis and review of S&amp;T cooperation patterns”. An objective of the task 5.7. was the annual monitoring of the EU-EECA cooperation in FP7.</p> <p>The basis of current report is the E-CORDA online reporting facility, which enabled access on the outcome of concluded FP7 calls for proposals, including participation and performance statistics.</p>

## **EXECUTIVE SUMMARY**

The report was prepared within the FP7 Action “Science and Technology International Cooperation Network for Eastern European and Central Asian Countries - IncoNet EECA”. This report was prepared as one of the outcomes of the IncoNet EECA Work Package 5 “Analyses, Monitoring and Review”. In the line of the main objective of the WP5 “To address key factors influencing the scientific cooperation between the EU and the EECA countries, in order to identify needs, to propose solutions and to feed the policy dialogue at the level of the Platforms” one of the objectives of the task 5.3. “Analysis and review of S&T cooperation patterns” was specified as following “Annual Monitoring of the EU-EECA cooperation in FP7”.

## 1 INTRODUCTION

The 7th Framework Programme, with a total budget of over € 50 billion (Euratom FP7 € 2.7 billion for 5 years), constitutes a key tool to respond to Europe's needs in terms of jobs, competitiveness, sustainable development, to meet the research needs of other Community policies, and to maintain leadership in the global knowledge economy.

2007 was the first year of the implementation of FP7. More than 23,000 proposals were received in response to 54 calls, with a high number of participants (110,101). After the selection procedure, 2,854 of them were retained for funding (involving some 19,541 participants).

The ten Themes identified in the **Cooperation** programme reflect the key fields of knowledge and technology in which research excellence is particularly important to improve Europe's ability to address the social, economic, public health, environmental and industrial challenges for the future. In total, 8,030 proposals have been submitted in 2007 and more than 1,000 retained for funding.

In the **Ideas** programme, the first year of the ERC formal operation was characterised by the creation of management and organisational structures as well as the organisation of the first call of proposals, the "Starting Grants", designed to support researchers in the early stage of their careers. For this first call 9,167 proposals were submitted, showing the big interest to this new initiative. Almost 300 of them were retained for funding.

The **People** programme supports a range of actions to foster the training and networking of researchers, career development, life-long learning and industry-academia partnership. In 2007, 4,195 proposals were submitted and more than 1,000 retained.

The **Capacities** programme aims at developing the best possible resources and conditions for Europe's research community. In total, 1,753 proposals were submitted for the different activities of the programme, and approximately 300 were retained.

Regarding the **Euratom** FP7, 57 proposals were submitted on nuclear fission and radiation protection and 15 of them were retained for funding. 1

The launch of the 7th EU RTD Framework Programme (FP7), 2007-2013, places new emphasis on international research cooperation which is increasingly seen as being at the centre of Community policies.

Science and technological development has always been an international endeavour, but increasing global challenges such as intensified economic globalisation, the rise of new global players and the provision of global public goods, reinforce the case for a new approach to international cooperation in science and technology from a European perspective. The new approach to international cooperation in FP7 aims to rise to these challenges by way of innovative mechanisms for promoting international research collaboration. It aims to address three interdependent objectives:

- supporting European scientific and economic development through strategic partnerships with third countries in selected fields of science and by engaging the best third country scientists to work in and with Europe;
- facilitating contacts with partners in third countries with the aim of providing better access to research carried out elsewhere in the World;

---

1 Report from the Commission. Annual Report on research and technological development activities of the European Union in 2007. SEC(2008) 2380. COM(2008) 519 final.

- addressing specific problems that third countries face or that have a global character (e.g. by contributing towards Millennium Development Goals, addressing global climate change, combating biodiversity loss, water and energy scarcity).

## 2 ABBREVIATIONS AND DEFINITIONS

FP7	EU Seventh RTD Framework Programme, is implemented during the period of 2007 - 2013
EECA	Eastern Europe and Central Asia. The EECA region includes countries of Armenia, Azerbaijan, Belarus, Georgia, Kazakhstan, Kyrgyzstan, Moldova, Russia, Tajikistan, Turkmenistan, Ukraine, Uzbekistan
Health	Cooperation programme Thematic Priority “Health”
FAB	Cooperation programme Thematic Priority “Food, agriculture and biotechnology,,
ICT	Cooperation programme Thematic Priority “Information and communication technologies”
NMP	Cooperation programme Thematic Priority “Nanosciences, nanotechnologies, materials and new production technologies”
Energy	Cooperation programme Thematic Priority “Energy”
Environment	Cooperation programme Thematic Priority “Environment (including climate change)”
Transport	Cooperation programme Thematic Priority “Transport (including aeronautics)”
SSH	Cooperation programme Thematic Priority “Socio-economic sciences and the humanities”
Space	Cooperation programme Thematic Priority “Space”
Security	Cooperation programme Thematic Priority “Security”
Ideas	Ideas programme European Research Council grants
MCA	People programme Marie Curie Actions
ResInfra	Capacities programme area “ Research infrastructures “
SME	Capacities programme area “Research for the benefit of SMEs”
Regions of Knowledge	Capacities programme area “Regions of knowledge”
Research Potential	Capacities programme area “Research potential of Convergence Regions”
SiS	Capacities programme area “Science in society”
INCO	Capacities programme area “International cooperation”
Fusion Energy	European Atomic Energy Community (Euratom) field “Fusion Energy”
Fission	European Atomic Energy Community (Euratom) field “Nuclear fission and radiation protection”
AM	Armenia
AZ	Azerbaijan
BY	Belarus
GE	Georgia
KZ	Kazakhstan
KG	Kyrgyzstan
MD	Moldova
RU	Russia
TJ	Tajikistan
TM	Turkmenistan
UA	Ukraine
UZ	Uzbekistan

Associated	Associated Countries: Switzerland, Israel, Iceland, Liechtenstein, Montenegro, Norway
Candidate	Candidate Countries: Croatia, Former Yugoslav Republic of Macedonia, Turkey
EU-27	EU Member States: Austria, Belgium, Bulgaria, Cyprus, Czech Republic, Germany, Denmark, Estonia, Greece, Spain, Finland, France, Hungary, Ireland, Italy, Lithuania, Luxembourg, Latvia, Malta, Netherlands, Poland, Portugal, Romania, Sweden, Slovenia, Slovakia, United Kingdom
CSA	Funding scheme: coordination and support action
CSA-CA	Funding scheme: coordination and support action, coordination action
CSA-SA	Funding scheme: coordination and support action, support action
CP	Funding scheme: Collaborative project
SICA	Funding scheme: Specific international cooperation actions
BSG	Funding scheme: research for the benefit of specific groups
CP-CSA	Funding Scheme: combination of CP & CSA
NOE	Funding Scheme: network of excellence
MC	Funding scheme: support for training and career development of researchers (MARIE CURIE)
MC-ITN	Funding scheme: Initial Training Networks
MC-IAPP	Funding scheme: Industry-academia pathways and partnerships
MC-IOF	Funding scheme: International Outgoing Fellowships for Career Development
MC-IIF	Funding scheme: International Incoming Fellowships

### **3 METHODOLOGY OF THE ANALYSIS**

The basis of current report is the E-CORDA online reporting facility, which enabled access on the outcome of concluded FP7 calls for proposals, including participation and performance statistics.

Current release of the FP7 consolidated proposals and participants database contains information and data on 30518 successful applicants involved in 5105 proposals (as of 15th of October 2009).

## Options for International Cooperation in year 2009 (by Ph. Vialatte)

- **General opening**

Eligibility criteria; Minimum 3 different EU Member State (MS) or Associated Countries (AC) \ Beyond this minimum, all 3rd countries can participate. The participation of ICPC partners may be funded.

- **Targeted opening**

The participation of third country partners is particularly welcomed. The participation of international partners does not represent an eligibility criterion.

- **Specific International Co-operation Activities (SICA)**

Novelty in FP7 SICA are dedicated calls that unilaterally focus on a particular third country or group of countries aiming at addressing the specific needs of these targeted countries or regions. Eligibility and evaluation criteria: minimum 4 participants from different countries: 2 ICPC + 2 MS or AC .

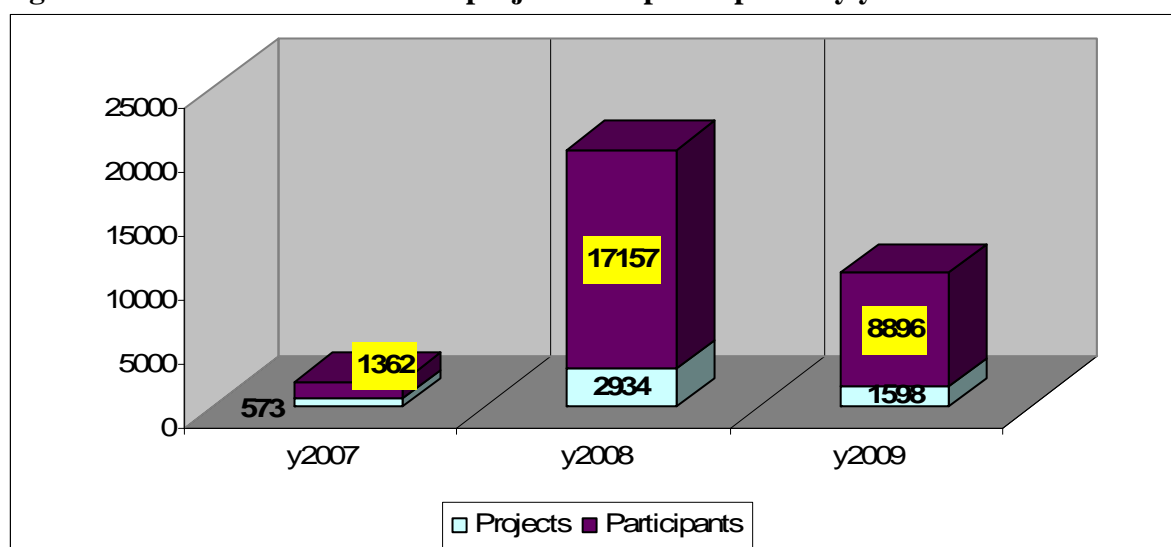

- **Coordinated calls**

Coordinated calls entail the alignment of content, timing, evaluation criteria and selection procedures, as well as resources to launch an FP7 call that is coordinated with a similar call issued by a funding agency in a third country. Coordinated calls aim at generating joint or closely coordinated projects, normally entailing a balanced bilateral partnership that is politically very different from the mere participation in FP7 projects.

- **Twinning of projects**

The aim is to bring together and facilitate knowledge exchange between existing or planned FP7 and third country research projects (the latter funded by a third country funding body) that are similar or complementary in scope and objectives. Twinning promote cooperation between projects independently generated and funded under FP7 and under third country research funding schemes.

**Figure 1. FP7: Distribution of the projects and participants by year.**

**Figure 2. FP7: the geographical distribution of the projects by year**

### 3.1 Performance statistics: EECA countries in FP7 (as 15 October 2009)

## 4 CONCLUSION

Main trend in FP7 is that international cooperation is steadily growing, third countries participate in 24,8% of projects, and constitute 9,9% of all participants. In total in projects with third countries participate 12270 institutions, which constitute 40,2% of all participants. Participants from EECA countries constitute 1,7% from all participants and 17,1% from third countries participants.

Year 2009 has been successful for all EECA countries – almost all of them have doubled their participants numbers. The most successful country is Russia, who is the same time the most successful country inside the third countries group - outperforming all other countries with its 170 successful projects. Despite this, there is still need for improvements. To make best from FP7, there is need to attract national matching funds. In case of EECA countries it means reorganizations in legal system. As indicate practices of other countries, in long run it will be worthwhile. (see Figure 3) .
