

# What is AI in Education?

2 Dimensions

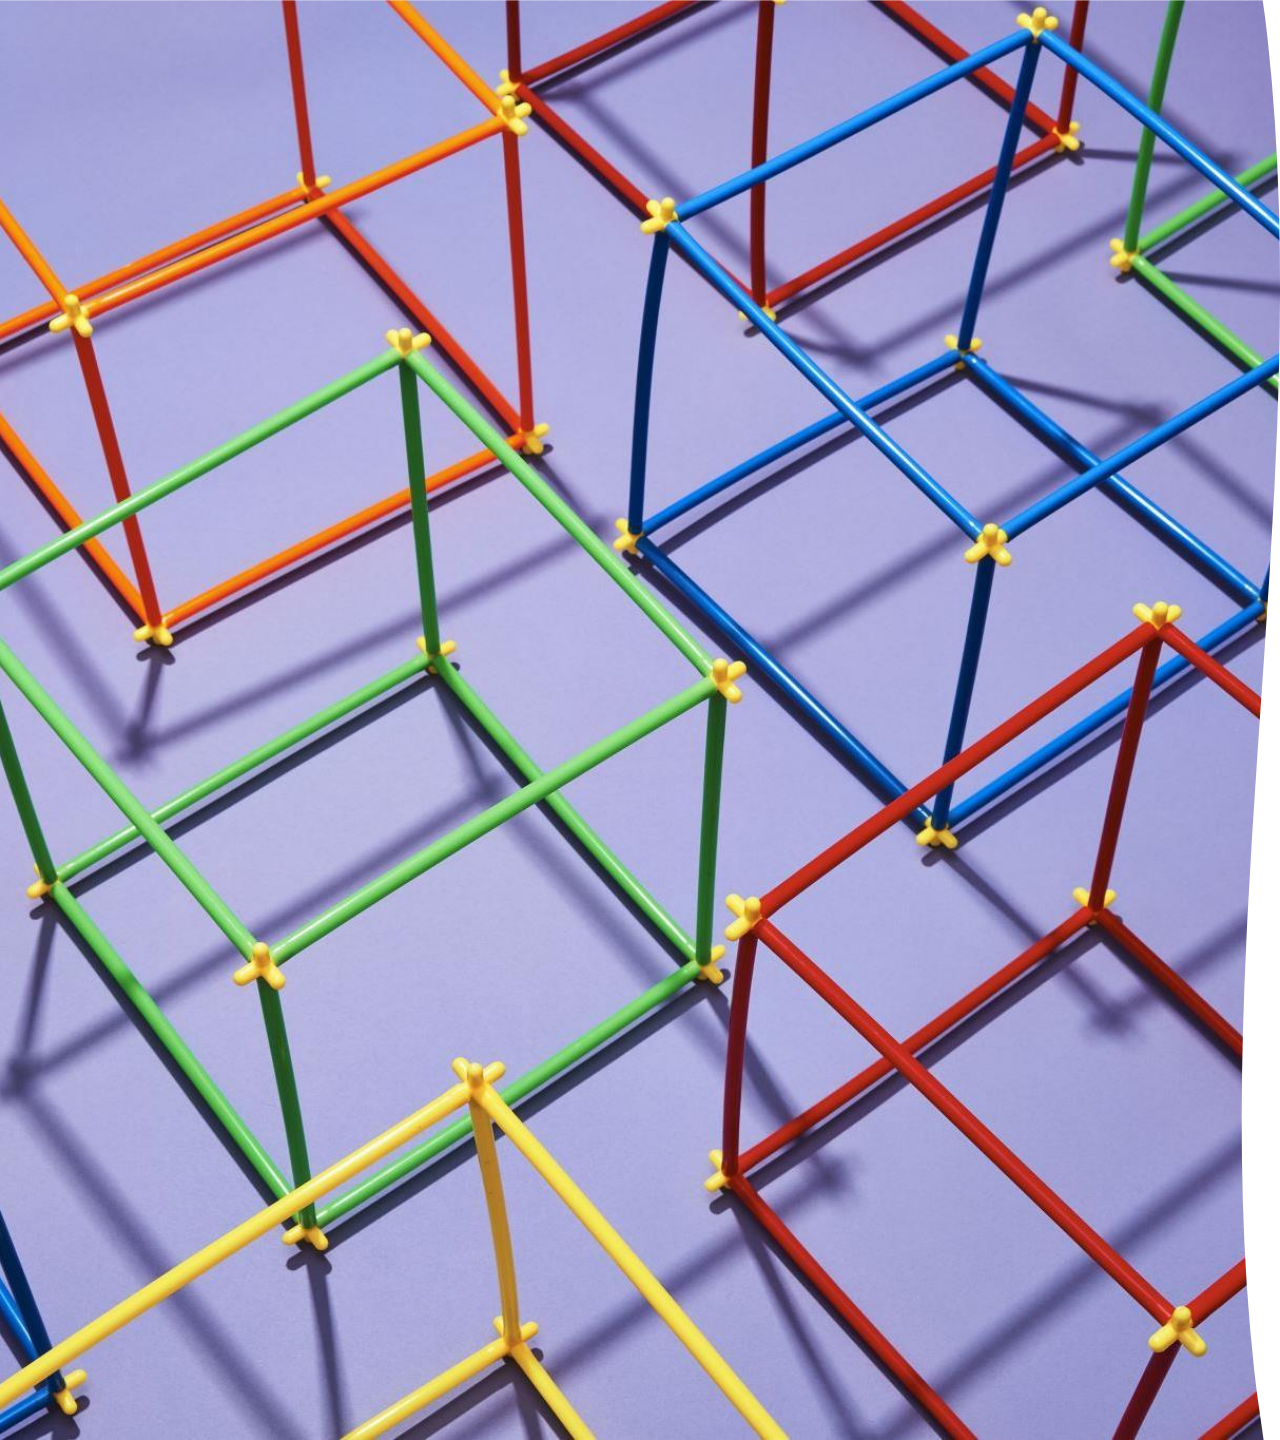

- Tool
- Subject to Teach

# AI as a Friend: Benefits

- Personalized Learning: Tailoring educational experiences
- Efficient Administrative Tasks: Automating grading
- Enhanced engagement: Interactive platforms
- Accessibility: Resources for students with disabilities

# AI as a Foe: Challenges

- Privacy and Data Security: Handling student data
- Equity and Access: Digital divide
- Ethical Considerations: Bias and fairness in algorithms
- Dependency and Critical Thinking: Over-reliance on AI tools

# AI as a Tool: Balance and Integration

- Ethical AI Implementation: Ensuring transparency and fairness
- Teacher and AI Collaboration: Combining human and AI strengths
- Continuous Monitoring: Regularly assessing impact
